

KLOVER MiK 09

Birding Version

Assembly & Care

The Birding Version of the KLOVER MiK 09 arrives with the microphone installed. The only assembly required is the threading of the pistol grip into the threaded hole in the bottom of the KLOVER MiK.

You can now plug the microphone into your smartphone and use your KLOVER MiK 09. (Remember to adjust your phone and app settings to use the external microphone.)

Microphone Installation Instructions:

(The following instructions are for your reference. They are not needed unless you replace the microphone.)

- Remove the dish from the frame by removing the three thumb screws.
- Thread an omnidirectional lavalier microphone through the center hole of the aluminum plate. Place the microphone cable on the lower support arm, then rotate the upper support arm down against the lower one, capturing the cable within the created center hole.
- Push the microphone into the support arms until it is seated against the two support arms.
- Move the support arms until the center of the pickup pattern is **1-1/8" behind the face of the frame that faces the dish**. (Use the square flange on the bottom of the dish, which is 1-1/8" wide, as a focusing aide.) Tighten the plastic jam nuts against the support arms to lock them in place.
- Replace the dish on the frame over the microphone and mount with the three thumb screws. (Secure the microphone cable to the frame along an appropriate path using the supplied Velcro strips.)

For video demonstrations of the assembly process, please visit our support page at kloverproducts.com/support.

(Continued on the back)

Cleaning Instructions:

- ONLY use ammonia-free cleaning products, such as "Sparkle," to clean the parabolic dish.

Registration:

- Please register your product using the Registration form at klovermik.com/registration so we can inform you of any updates or other important news.

Troubleshooting:

If you are having problems getting audio from your Klover MiK 09:

- 1) Check your phone and app settings. Adjust the settings to use the external microphone.
- 2) If you cannot hear the audio, adjust the phone and app settings to use your earbuds or headphones.

If you are still dissatisfied with the audio you capture, please email us at help@KloverProducts.com or call us at (608) 371-5660.
